

CCSU BCA 1st Semester – Environmental Science & Sustainability

2026 Exam-Oriented Important Notes

Unit I – Environment & Ecosystem

- Components of environment
- Ecosystem structure and functions
- Food chain, food web and ecological pyramids
- Energy flow and nutrient cycles

Unit II – Natural Resources & Biodiversity

- Forest, water, mineral and energy resources
- Renewable and non-renewable resources
- Biodiversity levels and values
- Threats to biodiversity and conservation

Unit III – Pollution & Climate

- Air, water, soil and noise pollution
- Sources, effects and control measures
- Global warming and climate change
- Ozone depletion and acid rain
- Waste management

Unit IV – Sustainability

- Sustainable development
- Renewable energy
- 3R principle: Reduce, Reuse, Recycle
- Environmental conservation
- Individual and community role in sustainability

■ Important Questions for Revision

- Explain ecosystem and energy flow.
- Discuss biodiversity and conservation.
- Explain major types of pollution and control measures.
- What are global warming and climate change?
- Explain sustainable development and the 3Rs.
- Write short notes on renewable energy and waste management.

Note: These are revision-oriented notes aligned to the current CCSU BCA 2025–26 subject structure; they are not a prediction of the exact 2026 paper.
